You are invited to join us for a Nursing Science Scholar Forum:

Leveraging Combination Personalized Peer, Community, and Technology Driven Interventions to Enhance Public Health

Ralph DiClemente
Professor and Chair
Department of Social & Behavior Sciences
New York University

Dr. DiClemente is Professor and Chair, Department of Social & Behavioral Sciences, Professor, Department of Epidemiology, and Associate Dean, Public Health Innovation, College of Global Public Health, New York University. Dr. DiClemente is an internationally recognized expert in developing implementation science interventions to enhance the uptake, adoption and sustainability of HIV/STD prevention programs in the community; and enhancing vaccine uptake among high-risk adolescents and women, such as HPV and influenza vaccine. He has also developed diabetes screening and behavior change interventions, blending personalized public health, community and technology-based approaches designed to optimize program effectiveness and enhance programmatic sustainability. He is author of 10 CDC-defined evidence-based interventions for adolescents and young African American women and men.

Thursday, November 15, 2018 from 2:00 – 3:00 p.m.
Location: Berk Hall, Room 250
